

# Find these 5 insects

**1.Dragonflies** have a large head with 2 huge eyes. Their 4 wings can flap at different times and they can fly up to 35 mph. Find them around fresh water on warm, sunny days.

**2.Mosquitos** will bite you, but only the female. They are tiny & pesky and found almost anywhere in the world.

**3.Lady Bug** is a type of beetle, often red with small black spots on the wing covers. Do you know the nursery rhyme about a lady bug?

**4.Daddylonglegs** have 8 very skinny legs, with eyes on the top of their head. They live on tree trunks, under logs and rocks.

**5.Ants** are everywhere. They live in colonies and can carry things much larger & heavier than they are.

1.Dragonflies

2.Mosquitos

3.Lady Bug

4.Daddylonglegs

5.Ants
